

**SILVERCRAFT**

LLC

*YOUR DOOR TO HIGHER STANDARDS*

*Aluminum Dutch Doors & Sliding Doors*

Located in the heart of Amish Country in Northern Indiana, *Silvercraft* has a vision of providing builders with solution-driven products to save valuable time on the job site.

Having experienced the inefficient and time-consuming nature of building barn doors on-site in less than ideal conditions, *Silvercraft* was created to eliminate these frustrations. This led to the development of fabricated pre-hung doors that could easily be slid into an opening, set, and finished with little on-site assembly.

Today we offer Dutch Doors, Sliding Doors, Bale Doors, and Loft Doors that meet those objectives.

Our heritage has taught us that service, integrity, hard work, and attention to detail are essential ingredients in life as well as in business. Thank you for choosing *Silvercraft* for your next project.

- Multiple Designs Available for  
Single & Split Sliding Doors
- Available in a Wide Array of Colors  
and Sizes from 3' X 7' To 14' X 14'

# STANDARD FEATURES

Centerlatch

An internal latch that joins  
Split Sliding Doors together

Jamb Bracket Guide

Hidden jamb bracket prevents  
door from pushing out and  
helps door alignment when  
opening and closing.

OPTIONAL  
Brush Seal

Limits air infiltration around  
the perimeter of the door  
opening without affecting the  
sliding action of the door.

OPTIONAL  
Bottom Guide Rail

Provides door stability for  
large sliding doors in windy  
conditions as well as assisting  
with door alignment when  
opening and closing.
